

Year 1: Science-Animals including Humans Knowledge Organiser

Key Vocabulary

BODY- The main part of a person or animal.

SKIN- An organ that covers our body and helps us to feel or touch things.

EYES- Organs that let light messages get to our brain.

EARS- Parts of the body that send sounds to our brain.

NOSE- A part of the head that allows us to smell.

SENSES- 5 ways we can use to find things out about the world.

TONGUE- A fleshy part of the mouth used for talking, swallowing and tasting.

HUMAN- Humans are warm-blooded mammals.

Key Facts

Our five senses

SMELL

We smell using our nose.

TOUCH

We touch using the skin on parts of our body, like our hands.

TASTE

We taste using our tongue.

HEARING

We hear using our ears.

SIGHT

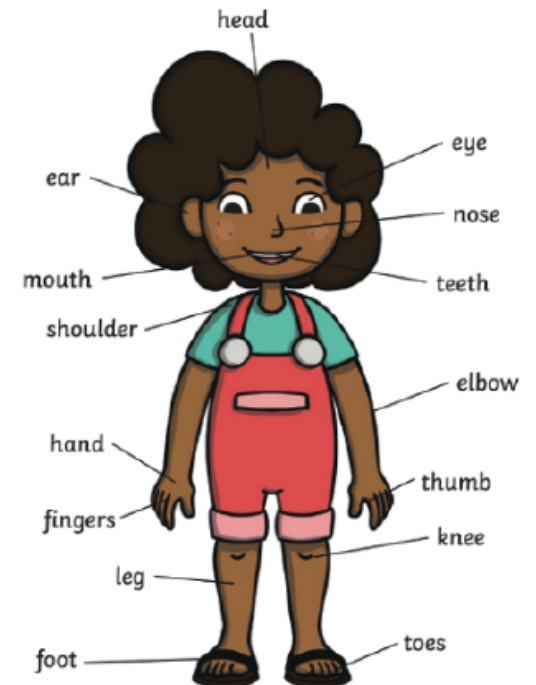

We see using our eyes.

Scientific Skill Focus

Carry out simple tests

Body Parts

Year 1: Toys Knowledge Organiser

Key Vocabulary

OLD: something that has existed for many years.

NEW: something that has been recently made.

PLASTIC: a type of material that can be easily shaped when soft.

METAL: a type of material that can be shaped under heat or pressure.

WOOD: a hard material found under tree bark.

PULL-ALONG: something that you drag for it to move.

BATTERY: a device that makes electricity.

ELECTRIC: uses electricity as an energy.

Key Facts

How have toys changed?

Toys have changed a lot over a short time. The biggest changes are to the materials (metal, plastic and wood) used to make them and how they work e.g. batteries, pull along.

What were our parents and grandparents toys like?

Parents and Grandparents would have taken part in more outdoor games and activities compared to today.

Similarities and Differences

Similarity: They both look like trains.

Difference: The old one is a pull-along with string and the new one moves uses batteries.

Similarity: They both have 4 wheels.

Difference: The old ones are made of metal and new ones are made from plastic.
